

Contribution Journal Report for Lab 04

Prepared for Prof. Vishwantha Rao, HCC ITAI 1371 Machine Learning

Prepared by FA26_ML_6171_16347 3_ITAI1371 Group

04-Sep-2026

This report was prepared for Lab 04 (L04) for ITAI 1371 Machine Learning, by the group FA26_ML_6171_16347 3_ITAI1371.

Members of the group include the following students:

- Carmen Petronila Esono Afang
- Yuanyuan Kou
- Irene “Alex” Ramos
- Eric Roberson
- Xiomara Torres

Please refer to the ReadMe.MD file at <https://github.com/ericjroberson-HOU/ITAI-1371-ML-Labs> for intellectual property used in all labs for the course.

Thank you for the opportunity to prepare this reflective journal report. Individual contributions follow.

- **Eric Roberson** - Performed each of the following tasks for L04:
 1. Created folders on OneDrive for upcoming lab.
 2. Sent an announcement to the team regarding deadline to submit assignment and instructions to update to the Reflection & Contribution Journals, and then synced up with Irene “Alex” Ramos to mention the next assignment on GroupMe.
 3. Downloaded the file .IPYNB file for the lab and parsed it myself for my own learning.
 4. Updated the contribution and reflection journals with my own input.

5. Took responsibility for converting the files on OneDrive and uploading the .PDF files to GitHub before 11PM on the due date.
6. Synced up with Irene “Alex” Ramos about submitting the assignments.

- **Carmen Petronila Esono Afang.**

I reviewed the instructions and code to make sure I understood the dataset and how to create the required graphs

I checked with my group members to align on how to solve the exercise correctly

I edited my part of the notebook, making sure the code worked and the graphs rendered properly.

I wrote down my key takeaway from the analysis and answered the final reflection questions.

- **Yuanyuan Kou**

For Lab 04, I carefully followed the notebook instructions and completed the required student sections. I created the port of embarkation count plot and used different colors to compare passengers who survived with those who died. I also created a box plot to compare ticket fares by survival status. I studied the graphs and wrote my own explanations of what they showed.

I completed the three Knowledge Check questions in a Markdown cell. I explained the purpose of EDA, described the type of passenger who had the best chance of survival, and discussed why visualizations are useful. I also checked the notebook from the beginning to the end to make sure the code ran correctly and that all graphs and outputs were visible. Through this work, I contributed completed code, written analysis, and careful review to the group assignment.

- **Irene “Alex” Ramos**

1. Completed assignment in Google Colab

2. Created a reflective journal
 3. Created the contribution journal
 4. Messaged group in GroupMe about project updates and needed contributions
 5. Sent documents to shared Onedrive
 6. Copied templates into lab folders
- Xiomara Torres

This concludes our contribution journal for ITAI 1371 ML Lab 04, which was uploaded to [GitHub](#) on 08-Sep-2026.
